

CANCER IMPACT FUND

MedTech Ventures

Business Analyst Internship Position

(Part-time, contract position)

To apply please send your resume to careers@cancerimpactfund.com

About the Cancer Impact Fund - The Cancer Impact Fund (CIF) is the first early stage impact venture capital fund designed to impact cancer by commercializing promising cancer research for preventions, therapies, cures, and enabling technologies. Learn more at www.CancerImpactFund.com.

About the Position - CIF is seeking outstanding candidates to help grow a portfolio of new ventures commercializing health innovations and co-create new ventures in collaboration with university, industry, and venture capital partners through the MedTech Ventures Workshop (www.CancerImpactFund.com/MTV). Successful interns will gain valuable work experience and may have the opportunity to move into apprenticeship with CIF or one of its portfolio companies. Interns can expect to work 5-15 hours per week at the CIF offices, remotely, and offsite at events and meetings.

About you - Prior work experience is optional, but passion, enthusiasm, and commitment are definitely required. If you're the ideal candidate, then you're as passionate about our mission as we are, you're entrepreneurial, and able to work independently in an unstructured environment where initiative, creativity, maturity and enthusiasm for learning are highly valued. If you're all of that AND you've applied to the MedTech Ventures Workshop (link above) then, congratulations, you're an exceptional candidate!

Roles & Responsibilities - CIF internships are challenging. You're going to get your hands dirty. You'll be assigned projects and tasks that you'll need to figure out how to complete on your own. You'll be responsible for self-managing your day-to-day work, collaborating with others, and supporting senior team members. You'll be thrown in the deep end of the pool and you'll sink or swim. When you sink, you'll need to quickly understand why, learn from it, and move on. Assignments may include:

- Research & Analysis - perform market research, analyze and interpret data, and apply to make recommendations or decisions on market opportunities, products, competition, strategy, and more.
- Business Administration - form new companies, establishing and owning business processes for accounting, finance, sales, marketing, business development, operations, and more.
- Reports, Presentations, and Proposals - outline, draft, and edit deliverables for prospective and active client engagements

Qualifications

- Significant level of maturity and the ability to work as a team and to work independently interfacing with top company executives, senior management, clients, prospects, and co-workers.
- Highly organized, with the initiative and ability to work with limited supervision; excellent analytical skills and attention to detail, effective process management abilities.
- Preferred candidates have completed a relevant associates, undergraduate, or graduate degree (Marketing, economics, entrepreneurship, MBA, biomedical engineering, communications, etc.)
- Exceptional candidates are enrolled in MedTech Venture Workshop through ASU.
