About ITRTV - CIF is seeking an outstanding incubation stage Product Development Director candidate with a proven track record to lead Research and Product Development for one of its portfolio companies, "ITRTV". The company is entering the incubation stage with a research and development platform for wearable technologies, sensors and sensor enabled applications for health and wellness. During this stage, efforts will be focused on validating the customer market, developing marketing and sales channels, obtaining initial revenues, and building the supply chain.

About the Position - Successful Product Development Directors may have the opportunity to continue on as the acceleration stage Product Development Director, or join CIF or one of its other portfolio companies on a part-time or full-time basis. Incubation stage Directors can expect to work 5-10 hours per week at the CIF offices, remotely, and offsite at events and meetings. Under the direction of the company's CEO, the Director's key responsibilities include:

- Collaborate with the CEO and incubation team to develop the company's supply chain, deliver first inventory of product, and launch customer software platform
- Manage product development team members to effectively validate beachhead market, gather feedback, and incorporate in succeeding prototype generations.
- Support Marketing and Sales with technical content for sales decks and presentations
- Develop and maintain detailed knowledge and insight about ITRTV's beachhead market, technology trends, and a complete understanding of customer needs
- Collaborate with the CEO to develop strategically benchmarked processes to ensure market competitiveness, an understanding of trends, and detailed knowledge of competitor products and processes.
- Develop, measure and report key metrics regarding product development activities to CEO
- Engage and support key strategic partnerships and relationships for related external technology
- Manage development for beta prototypes plus additional inventory within allocated budget
- Discover and implement new technologies that yield competitive advantage.
- Collaborate with the CEO to identify acceleration stage Product Development Director and support management transition

About you - We are seeking an experienced, entrepreneurial, and hands-on Product Development Director with strong leadership skills, experience developing new products and launching new ventures, and the ability to manage the incubation stage of our proprietary commercialization process. You have a demonstrated interest in bringing innovation to health, health care, fitness, wellness, or wellbeing.

Qualifications

- Proven track record of building and managing successful teams of 5-10 people preferred
- Experience developing platforms, products or solutions for research in the areas of health, healthcare, fitness, wellness, or well being preferred
- 5+ years of experience leading research and/or product development efforts preferred
- Ability to lead and work as part of a team and collaborate with senior management, strategic partners, incubation team members, clients, and prospects.

CANCER IMPACT FUND

- Demonstrated ability to work independently and self-manage executive assignments
- Highly organized, with the initiative and ability to work with limited supervision; excellent analytical skills and attention to detail, effective process management abilities.
